## Technical data

| Functional data | Valve size [mm] | 2" [50] |
| :---: | :---: | :---: |
|  | Fluid | chilled or hot water, up to 60\% glycol |
|  | Fluid Temp Range (water) | $0 . . .250^{\circ} \mathrm{F}\left[-18 . . .120^{\circ} \mathrm{C}\right]$ |
|  | Body Pressure Rating | 400 psi |
|  | Close-off pressure $\Delta$ ps | 200 psi |
|  | Flow characteristic | modified linear |
|  | Servicing | maintenance-free |
|  | Flow Pattern | 3-way Diverting |
|  | Leakage rate | 0\% |
|  | Controllable flow range | $75^{\circ}$ |
|  | Cv | 87 |
| Materials | Valve body | Nickel-plated brass body |
|  | Stem | nickel-plated brass |
|  | Seat | PTFE |
|  | Pipe connection | NPT |
|  | Ball | chrome plated brass |
| Suitable actuators | Non-Spring | ARB(X) |
|  | Spring | AFRB(X) |

Product features
Application This valve is typically used in air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include Unit Ventilators, VAV box reheat coils and bypass loops. This valve is suitable for use as diverting or change over valve.

Electrical installation

## ~INSTALLATION NOTES

A Actuators with appliance cables are numbered.

Provide overload protection and disconnect as required.
(3)

Actuators may also be powered by DC 24 V .
Two built-in auxiliary switches (2x SPDT), for end position indication, interlock control, fan startup, etc.

5
Only connect common to negative (-) leg of control circuits.

A $500 \Omega$ resistor (ZG-R01) converts the $4 \ldots 20 \mathrm{~mA}$ control signal to $2 \ldots . .10 \mathrm{~V}$.

Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 V line. For triac sink the Common connection from the actuator must be connected to the Hot connection of the controller. Position feedback cannot be used with a triac sink controller; the actuator internal common reference is not compatible.
Actuators may be controlled in parallel. Current draw and input impedance must be observed.
Master-Slave wiring required for piggy-back applications. Feedback from Master to control input(s) of Slave(s).
Meets cULus requirements without the need of an electrical ground connection.
Warning! Live electrical components!
During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches. Mixed or combined operation of line voltage/safety extra low voltage is not allowed.
