

Customizable Fail-Safe actuator for controlling dampers in typical commercial HVAC applications.

- Torque motor 270 in-lb [30 Nm]
- Nominal voltage AC/DC 24 V
- Control On/Off
- 2x SPDT

### **Electrical installation**

## Marning! Live electrical components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

Meets cULus requirements without the need of an electrical ground connection.

Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches. Mixed or combined operation of line voltage/safety extra low voltage is not allowed.

A Actuators with appliance cables are numbered.

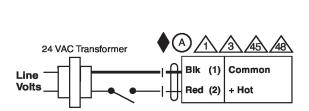

Provide overload protection and disconnect as required.

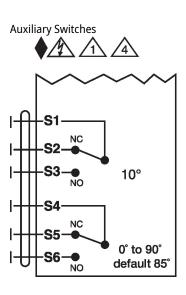

Actuators may also be powered by DC 24 V.

Two built-in auxiliary switches (2x SPDT), for end position indication, interlock control, fan startup, etc.

\Lambda Actuators may be powered in parallel. Power consumption must be observed.

A Parallel wiring required for piggy-back applications.

Wiring diagrams On/Off
