Resilient Seat, 304 Stainless Steel Disc
Butterfly Valve with Lug types

- Disc 304 stainless steel
- Bubble tight shut-off
- Resilient seat
- Valve face-to-face dimensions comply with

API 609 \& MSS-SP-67

- Completely assembled and tested, ready for installation

5-year warranty

Application PR Series valve actuators are designed with an integrated linkage and visual position indicators. For outdoor applications, the installed valve must be mounted with the actuator at or above horizontal. For indoor applications the actuator can be in any location including directly under the valve.

Operation The PR series actuator provides $90^{\circ}$ of rotation and a visual indicator shows the position of the valve. The PR Series actuator uses a low power consumption brushless DC motor and is electronically protected against overload. A universal power supply is furnished to connect supply voltage in the range of AC $24 . . .240 \mathrm{~V}$ and DC $24 \ldots 125 \mathrm{~V}$. Included is a smart heater with thermostat to eliminate condensation. Two auxiliary switches are provided; one set at $10^{\circ}$ open and the other is field adjustable. Running time is field adjustable from $30 . . .120$ seconds by using the Near Field Communication (NFC) app and a smart phone.
†Use $60^{\circ} \mathrm{C} / 75^{\circ} \mathrm{C}$ copper wire size range $12 \ldots .28 \mathrm{AWG}$, stranded or solid. Use flexible metal conduit. Push the listed conduit fitting device over the actuator's cable to butt against the enclosure. Screw in conduit connector. Jacket the actuators input wiring with listed flexible conduit. Properly terminate the conduit in a suitable junction box. Rated impulse Voltage 4000 V. Type of action 1. Control pollution degree 3.

## Accessories

Mechanical accessories Description Type
Hand crank for PR, PKR, PM ZG-HND PR

## Electrical installation

(UP)
Meets cULus requirements without the need of an electrical ground connection.
Universal Power Supply (UP) models can be supplied with 24 VAC up to 240 VAC, or 24 VDC up to 125 VDC.
4 Disconnect power.
1 Provide overload protection and disconnect as required.
4 Two built-in auxiliary switches ( $2 x$ SPDT), for end position indication, interlock control, fan startup, etc.
46. Actuators may be controlled in parallel. Current draw and input impedance must be observed.

## Warning! Live electrical components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
