|                    | Valve plug                            | 316 stainless steel                           |
|                    | Stem                                  | 316 stainless steel                           |
|                    | Stem seal                             | EPDM O-ring                                   |
|                    | Seat                                  | Stainless steel AISI 316                      |
|                    | Pipe connection                       | NPT female ends                               |
| Suitable actuators | Non-Spring                            | LVB(X)  |

LVKB(X)

# Safety notes

Electronic fail-safe

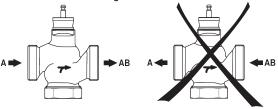

- WARNING: This product can expose you to lead which is known to the State of California to cause cancer and reproductive harm. For more information go to www.p65warnings.ca.gov
- The valve has been designed for use in stationary heating, ventilation and air-conditioning systems and
  must not be used outside the specified field of application, especially in aircraft or in any other airborne
  means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The valve does not contain any parts that can be replaced or repaired by the user.
- When determining the flow rate characteristic of controlled devices, the recognised directives must be
  observed.

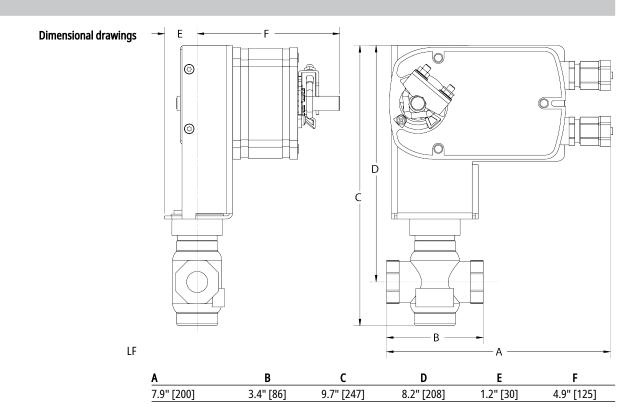

### **Installation notes**

Flow direction

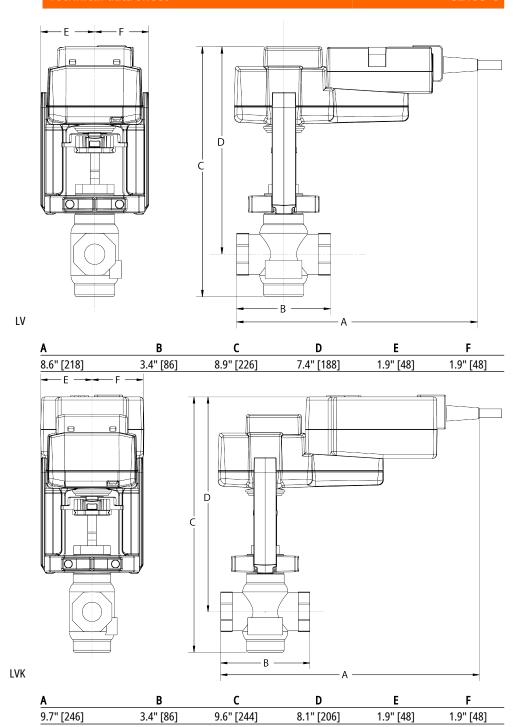

The direction of flow, specified by an arrow on the housing, is to be complied with, since otherwise the valve could become damaged.

### **Dimensions**

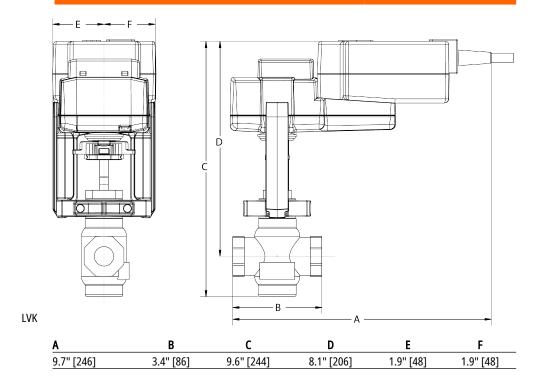

Technical data sheet G215S-C

| Technical data  |                                    |   |
|-----------------|------------------------------------|---|
| Electrical data | Nominal voltage                    | AC/DC 24 V  |
|                 | Nominal voltage frequency          | 50/60 Hz  |
|                 | Power consumption in operation     | 2.5 W   |
|                 | Power consumption in rest position | 1.5 W   |
|                 | Transformer sizing                 | 6 VA (class 2 power source)   |
|                 | Electrical Connection              | 18 GA plenum cable, 3 ft [1 m], with 1/2" conduit connector, degree of protection NEMA 2 / IP54 |
|                 | Overload Protection                | electronic throughout full stroke   |
|                 | Electrical Protection              | actuators are double insulated  |
| Functional data | Actuating force motor              | 115 lbf [500 N]   |
|                 | Operating range Y                  | 210 V   |
|                 | Operating range Y note             | 420 mA w/ ZG-R01 (500 $\Omega$ , 1/4 W resistor)  |
|                 | Input Impedance                    | 100 k $\Omega$ for 210 V (0.1 mA), 500 $\Omega$ for 420 mA                                      |
|                 | Position feedback U                | 210 V   |
|                 | Bridging time                      | 2 s delay before fail-safe activates  |
|                 | Pre-charging time                  | 520 s   |
|                 | Direction of motion motor          | selectable with switch  |
|                 | Direction of motion fail-safe      | reversible with switch  |
|                 | Manual override                    | 4 mm hex crank (shipped w/actuator)   |
|                 | Stroke                             | 0.75" [19 mm]   |
|                 | Running Time (Motor)               | 90 s constant, independent of load  |
|                 | Running time motor note            | constant, independent of load   |
|                 | Running time fail-safe             | <35 s   |
|                 | Noise level, motor                 | 55 dB(A)  |
|                 | Noise level, fail-safe             | 60 dB(A)  |
|                 | Position indication                | Mechanically, with pointer  |

|                 | Ambient humidity                   | max. 95% r.H., non-condensing   |
|                 | Servicing                          | maintenance-free  |
| Weight          | Weight                             | 3.53 lb [1.6 kg]  |
| Materials       | Housing material                   | Die cast aluminium and plastic casing   |

# Safety notes

Technical data sheet LVKB24-SR

- PVC W'Shld for GV w/UGLK (GM)
- Battery Back Up System for SY(7~10)-110
- 120 to 24 VAC, 40 VA transformer.
- 50% voltage divider kit (resistors with wires).
- PC Tool computer programming interface, serial port.

#### **Electrical installation**

## > INSTALLATION NOTES

Actuators may also be powered by 24 VDC.

 $\frac{5}{5}$  Only connect common to negative (-) leg of control circuits.

 $\triangle$  A 500  $\Omega$  resistor (ZG-R01) converts the 4...20 mA control signal to 2...10 V.

Actuators with plenum cable do not have numbers; use color codes instead.

Meets cULus requirements without the need of an electrical ground connection.

#### **Warning! Live Electrical Components!**

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

VDC / 4 to 20 mA
