| Type    | DN |
| G215S-F | 15 |

## Technical data

|                           |                                       |   |
|---------------------------|---------------------------------------|---|
| <b>Functional data</b>    | Valve Size                            | 0.5" [15]                                     |
|                           | Fluid                                 | chilled or hot water, up to 60% glycol, steam |
|                           | Fluid Temp Range (water)              | 20...338°F [-7...170°C]                       |
|                           | Fluid Temp Range (steam)              | 32...338°F [0...170°C]                        |
|                           | Body Pressure Rating                  | ANSI Class 250, up to 400 psi below 150°F     |
|                           | Flow characteristic                   | modified equal percentage                     |
|                           | Servicing                             | repack kits available                         |
|                           | Rangeability Sv                       | 100:1   |
|                           | Maximum differential pressure (water) | 50 psi [345 kPa]                              |
|                           | Max Differential Pressure (Steam)     | 50 psi [345 kPa]                              |
|                           | Flow Pattern                          | 2-way   |
|                           | Leakage rate                          | ANSI Class VI                                 |
|                           | Controllable flow range               | stem up - open A – AB                         |
|                           | Cv                                    | 1.3   |
|                           | Maximum Inlet Pressure (Steam)        | 100 psi [690 kPa]                             |
|                           | ANSI Class                            | 250   |
| Body pressure rating note | up to 400 psi below 150°F             |   |
| <b>Materials</b>          | Valve body                            | Bronze  |
|                           | Valve plug                            | 316 stainless steel                           |
|                           | Stem                                  | 316 stainless steel                           |
|                           | Stem seal                             | EPDM O-ring                                   |
|                           | Seat                                  | Stainless steel AISI 316                      |
|                           | Pipe connection                       | NPT female ends                               |
| <b>Suitable actuators</b> | Non-Spring                            | LVB(X)  |
|                           | Electronic fail-safe                  | LVKB(X)                                       |

## Safety notes

- **WARNING:** This product can expose you to lead which is known to the State of California to cause cancer and reproductive harm. For more information go to [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov)
- The valve has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The valve does not contain any parts that can be replaced or repaired by the user.
- When determining the flow rate characteristic of controlled devices, the recognised directives must be observed.

**Installation notes**

**Flow direction** The direction of flow, specified by an arrow on the housing, is to be complied with, since otherwise the valve could become damaged.

|                        | Ambient humidity                   | max. 95% r.H., non-condensing   |
|                        | Servicing                          | maintenance-free  |
| <b>Weight</b>          | Weight                             | 2.43 lb [1.1 kg]  |
| <b>Materials</b>       | Housing material                   | Die cast aluminium and plastic casing   |

## Safety notes

- PVC W/Shld for GV w/UGLK (GM)
- Battery Back Up System for SY(7~10)-110
- 120 to 24 VAC, 40 VA transformer.
- 50% voltage divider kit (resistors with wires).
- PC Tool computer programming interface, serial port.

## Electrical installation

**✂ INSTALLATION NOTES**

**2** Actuators may be connected in parallel. Power consumption and input impedance must be observed.

**3** Actuators may also be powered by 24 VDC.

**18** Actuators with plenum cable do not have numbers; use color codes instead.

◆ Meets cULus requirements without the need of an electrical ground connection.

**⚠ Warning! Live Electrical Components!**

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
