

Type overview

Туре			DN
G7125DS-250			125
echnical data			
	Functional data	Valve size [mm]	5" [125]
		Fluid	chilled or hot water, up to 60% glycol
		Fluid Temp Range (water)	32300°F [0149°C]
		Body Pressure Rating	ANSI Class 250, up to 280 psi below 350°F
		Flow characteristic	linear
		Servicing	repack/rebuild kits available
		Rangeability Sv	50:1
		Flow Pattern	3-way Diverting
		Leakage rate	ANSI Class III
		Controllable flow range	stem up - open AB – B
		Cv	195
	Materials	Valve body	Cast iron - ASTM A126 Class B
		Valve plug	Stainless steel
		Stem	316 stainless steel
		Stem seal	NLP EPDM (no lip packing)

- The valve has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Only authorized specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The valve does not contain any parts that can be replaced or repaired by the user.
- When determining the flow rate characteristic of controlled devices, the recognised directives must be observed.

Footnotes

† Use flexible metal conduit. Push the listed conduit fitting device over the actuator's cable to butt against the enclosure. Screw in conduit connector. Jacket the actuators input wiring with listed flexible conduit. Properly terminate the conduit in a suitable junction box. Rated impulse Voltage 800V. Type of action 1. Control pollution degree 3.

Electrical installation

X INSTALLATION NOTES

🛕 Actuators may be connected in parallel. Power consumption and input impedance must be

Actuators may also be powered by DC 24 V.

 Λ A 500 Ω resistor (ZG-R01) converts the 4...20 mA control signal to 2...10 V. Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 V line.

For triac sink the common connection from the actuator must be connected to the hot connection of the controller. Contact closures A & B also can be triacs. A & B should both be closed for the triac source and open for triac sink.

Actuators with plenum cable do not have numbers; use color codes instead.

Meets cULus requirements without the need of an electrical ground connection.

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
