Servicing

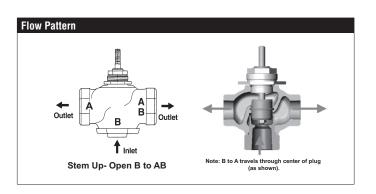

G320D, 3-Way, Globe Valve, Bronze Trim, Diverting

Technical Data		
Service	chilled, hot water, up to 60% glycol	
Flow Characteristic	linear	
Controllable Flow Range	stem up - open B to AB	
Size [mm]	0.75" [20]	
End Fitting	NPT female ends	
Body	bronze	
Stem	stainless steel	
Stem Packing	spring loaded Teflon® V-ring	
Seat	bronze	
Plug	brass	
Disc	composition (EPDM)	
Body Pressure Rating [psi]	ANSI 250	
ANSI Class	ANSI 250 (up to 400 psi below 150°F)	
Media Temperature Range	20°F to 280°F [-7°C to 138°C]	
(Water)		
Max Differential Pressure (Water)	35 psi (241 kPa)	
Rangeability	500:1	
Cv	7.5	
Weight	2.2 lb [1 kg]	
Leakage	ANSI Class III	

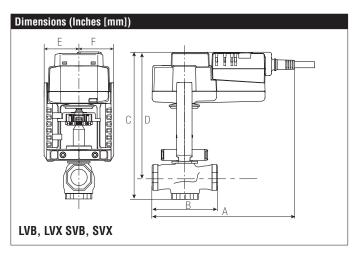

Repack/Rebuild kits available

Application

This valve is typically used in Air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include Unit Ventilators, VAV box re-heat coils and bypass loops. This valve is suitable for use in hydronic system with constant or variable flow. 3-way valves are available with mixing or diverting flow patterns.

Suitable Actuators

	Non-Spring	Spring	Electronic Fail-Safe
G320D	LVB(X)	LF	LVKB(X)

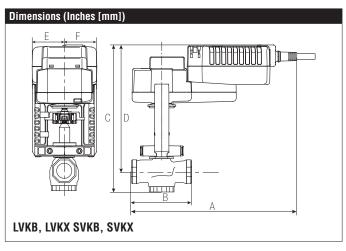

А	В	C	D	Е	F
7.8" [200]	3.62" [92]	9.45" [240]	8.11" [206]	1.95	" [49]

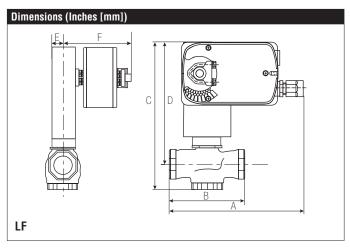

Piping

The valves should be mounted in a weather-protected area in a location that is within the ambient limits of the actuator. Allow sufficient room for valve with actuator and for service. The G2(S) and G3(D) preferred mounting position of the valve is with the valve stem vertical above the valve body, for maximum life. However, the assemblies can be mounted with the valve stem vertical or horizontal in relation to the pipe. The actuators should never be mounted underneath the valve, as condensation can build up and result in a failure of the actuators. Do not reverse flow direction.

Wiring Diagrams

X INSTALLATION NOTES

Actuators with appliance cables are numbered.

Provide overload protection and disconnect as required.

Actuators may also be powered by 24 VDC.

Actuators may be connected in parallel if not mechanically linked. Power consumption and input impedance must be observed.

Meets cULus requirements without the need of an electrical ground connection.

WARNING! LIVE ELECTRICAL COMPONENTS!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
