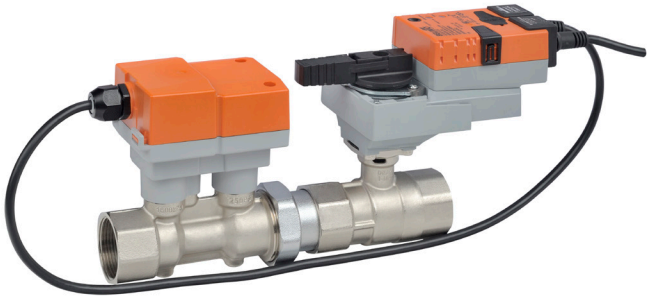
P2125S-231, 1-1/4", Electronic Pressure Independent Valve

Stainless Steel Ball and Stem, Female NPT Ends



Application

Water-side control of heating and cooling systems for AHUs and water coils. Equal Percentage/ Linear: heating and cooling applications.

Operation

The Electronic Pressure Independent Control Valve is a two-way valve that maintains constant flow regardless of pressure variations in the system.

Product Features

Provides constant flow regardless of pressure variations in the system.
Maximizes chiller ΔR, preventing energizing additional chillers due to low ΔT.
Simplified valve sizing and selection, no Cv calculations required.
