	Spring	TFRB(X) LF

### Safety notes

• WARNING: This product can expose you to lead which is known to the State of California to cause cancer and reproductive harm. For more information go to www.p65warnings.ca.gov

### **Product features**

Application

This valve is typically used in air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include Unit Ventilators, VAV box reheat coils and bypass loops. This valve is suitable for use in a hydronic system with variable flow.

## **Technical data**

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Power consumption in operation	2.5 W
	Power consumption in rest position	1 W
	Transformer sizing	5 VA (class 2 power source)
	Electrical Connection	18 GA appliance cable, 3 ft [1 m], with 1/2" conduit connector
	Overload Protection	electronic throughout 095° rotation
	Electrical Protection	actuators are double insulated
Functional data	Torque motor	35 in-lb [4 Nm]
	Options positioning signal	variable (VDC, PWM, on/off, floating point)
	Position feedback U variable	VDC variable
	Direction of motion motor	selectable with switch 0/1
	Direction of motion fail-safe	reversible with cw/ccw mounting
	Angle of rotation	Max. 95°, adjustable with mechanical stop
	Angle of rotation note	adjustable with mechanical stop
	Running Time (Motor)	default 150 s, variable 75300 s
	Running time motor variable	75300 s
	Running time fail-safe	<25 s @ -4122°F [-2050°C], <60 s @ -22°F [-30°C]
	Angle of rotation adaptation	off (default)
	Override control	MIN (minimum position) = 0% MID (intermediate position) = 50% MAX (maximum position) = 100%
	Noise level, motor	30 dB(A)
	Noise level, fail-safe	62 dB(A)
	Shaft Diameter	3/81/2" round, centers on 1/2"
	Position indication	Mechanical
Safety data	Degree of protection IEC/EN	IP54
	Degree of protection NEMA/UL	NEMA 2
	Enclosure	UL Enclosure Type 2
	Agency Listing	cULus acc. To UL 873 and CAN/CSA C22.2 No. 24-93; Listed to UL 2043 - suitable for use in air plenums per Section 300.22(c) of the NEC and Section 602.2 of the IMC
	Quality Standard	ISO 9001
	Ambient temperature	-22122°F [-3050°C]
	Storage temperature	-40176°F [-4080°C]
	Ambient humidity	Max. 95% RH, non-condensing

Technical data sheet

LF24-MFT US

Safety data	Servicing	maintenance-free
Weight	Weight	3.3 lb [1.5 kg]
Materials	Housing material	galvanized steel
Product features		
Default/Configuration	manufacturing. If required, cust	DC applications of the LFMFT actuator are assigned during om versions of the actuator can be ordered. The parameters are three means: Factory pre-set or custom configuration, set by ware or the handheld ZTH US.
Application	For fail-safe, modulating control of dampers in HVAC systems. Actuator sizing should be done accordance with the damper manufacturer's specifications. A feedback signal is provided for position indication.	
Operation	The LF24-MFT US actuator provides 95° of rotation and is provided with a graduated position indicator showing 0° to 95°. The actuator will synchronize the 0° mechanical stop or the damper or valves mechanical stop and use this point for its zero position during normal control operations. The actuator uses a brushless DC motor which is controlled by an Application Specific Integrated Circuit (ASIC) and a microprocessor. The microprocessor provides the intelligence to the ASIC to provide a constant rotation rate and to know the actuator's exact position. The ASIC monitors and controls the brushless DC motor's rotation and provides a Digital Rotation Sensing (DRS) function to prevent damage to the actuator in a stall condition. The position feedback signal is generated without the need for mechanical feedback potentiometers using DRS. The actuator may be stalled anywhere in its normal rotation without the need of mechanical end switches. The LF24-MFT US is mounted directly to control shafts up to 3/4" diameter (K6-1 clamp) and anti-rotation bracket. A crank arm and several mounting brackets are available for damper applications where the actuator cannot be direct coupled to the damper shaft. The spring return system provides minimum specified torque to the application during a power interruption. The LF24-MFT US actuator is shipped in the zero position, compression against seats or gaskets for tight shut-off is accomplished manually.	
Typical specification	and linkage and be capable of d 1/2" shaft (default). Actuator sha must provide modulating damp $500\Omega$ resistor, a 4 to 20 mA cont actuators must be designed so t fail-safe operation. Actuators sh be protected from overload at a independent of torque. A 2 to 10 Actuators with auxiliary switches Insulation so an electrical groun cULus listed and have a 5 year w	tuators shall be direct coupled type which require no crank arm irect mounting to a shaft up to a 3/4" diameter and center on a all deliver a minimum output torque of 35 in-lbs. The actuator er control in response to a 2 to 10 VDC or, with the addition of a rol input from an electronic controller or positioner. The hat they may be used for either clockwise or counter clockwise all use a brushless DC motor controlled by a microprocessor and Il angles of rotation. Run time shall be constant, and 0 VDC feedback signal shall be provided for position feedback. s must be constructed to meet the requirements for Double id is not required to meet agency listings. Actuators shall be varranty, and be manufactured under ISO 9001 International ators shall be as manufactured by Belimo.
Factory settings	manufacturing. If required, cust	DC applications of the LFMFT actuator are assigned during om versions of the actuator can be ordered. The parameters are three means: Factory pre-set or custom configuration, set by ware or the handheld ZTH US.
