## **Product features**

Application

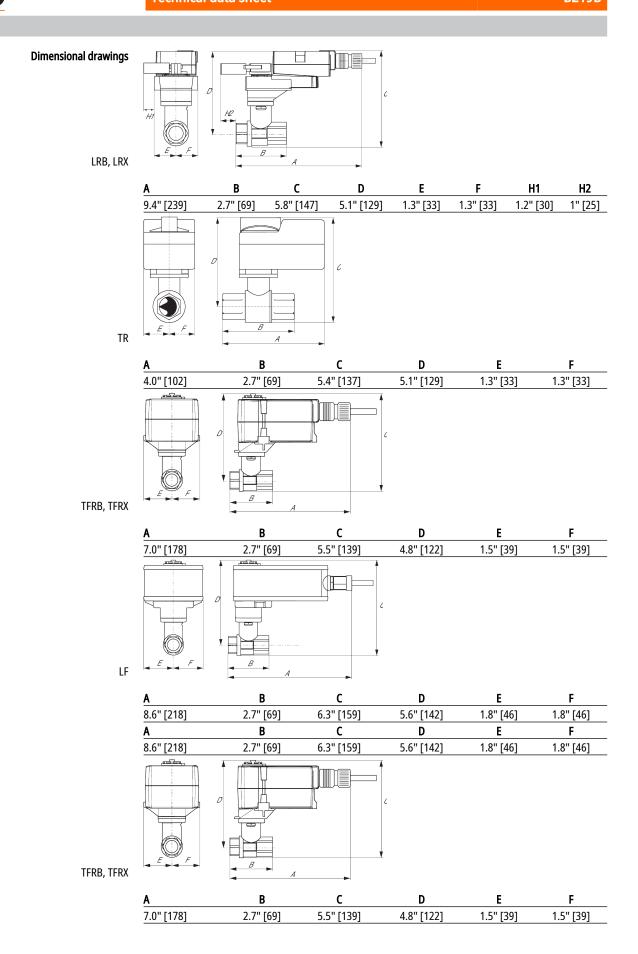

This valve is typically used in air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include Unit Ventilators, VAV box re-heat coils and bypass loops. This valve is suitable for use in a hydronic system with variable flow.

## Flow/Mounting details

On/Off, Floating Point, Non-Spring Return, AC 100...240 V

# Safety notes

Weight

Weight

- 3/8"-16 shaft clevis for AHK/AH.
- Battery Back Up System for SY(7~10)-110
- 5/16" shaft clevis for LH.
- Cable to ZIP-RS232 US to diagnostic/programming socket.

1.1 lb [0.50 kg]

• MFT95 resistor kit for 4 to 20 mA control applications.

# **Electrical installation**

Technical data sheet LRB120-3

### > INSTALLATION NOTES

(A) Actuators with appliance cables are numbered.

 $\sum$  Provide overload protection and disconnect as required.

Actuators may be connected in parallel. Power consumption and input impedance must be observed.

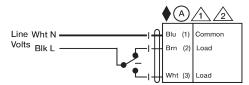

Meets cULus requirements without the need of an electrical ground connection.

### **Warning! Live Electrical Components!**

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

On/Off AC 100...240 V

Floating Point AC 100...240 V
