### **Technical data**

Functional data	Valve size [mm]	1" [25]
	Fluid	high temperature hot water/low pressure steam, up to 60% glycol
	Fluid Temp Range (water)	60266°F [16130°C]
	Fluid Temp Range (steam)	250°F [120°C]
	Body Pressure Rating	600 psi
	Close-off pressure Δps	200 psi
	Flow characteristic	A-port equal percentage
	Servicing	maintenance-free
	Max Differential Pressure (Steam)	15 psi
	Flow Pattern	2-way
	Leakage rate	0%
	Controllable flow range	75°
	Cv	28
	Maximum Inlet Pressure (Steam)	15 psi
Materials	Valve body	Nickel-plated brass (DZR) P-CuZn35Pb2
	Spindle	stainless steel
	Spindle seal	Vition O-ring
	Seat	ETFE
	Characterized disc	ETFE
	Pipe connection	NPT female ends
	O-ring	EPDM (lubricated)
	Ball	stainless steel
uitable actuators	Non-Spring	LRB(X)
	Spring	LF

# Application

n This valve is typically used in air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include unit ventilators, VAV box reheat coils and bypass loops. This valve is suitable for use in a hydronic system with variable flow. This valve is designed to fit in compact areas where on/off, floating point and modulating control is required using 24 VAC.

Product features		
Default/Configuration	manufacturing. If required, custom vers	ications of the LFMFT actuator are assigned during ions of the actuator can be ordered. The parameters are eans: Factory pre-set or custom configuration, set by the handheld ZTH US.
Application	For fail-safe, modulating control of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer's specifications. A feedback signal is provided for position indication.	
Operation	indicator showing 0° to 95°. The actuato or valves mechanical stop and use this p operations. The actuator uses a brushles Specific Integrated Circuit (ASIC) and a n intelligence to the ASIC to provide a com- position. Actuators shall use a be protected from overload at all angles independent of torque. A 2 to 10 VDC fee Actuators with auxiliary switches must b Insulation so an electrical ground is not	shall be direct coupled type which require no crank arm unting to a shaft up to a 3/4" diameter and center on a r a minimum output torque of 35 in-lbs. The actuator of in response to a 2 to 10 VDC or, with the addition of a t from an electronic controller or positioner. The may be used for either clockwise or counter clockwise brushless DC motor controlled by a microprocessor and of rotation. Run time shall be constant, and edback signal shall be provided for position feedback. e constructed to meet the requirements for Double required to meet agency listings. Actuators shall be and be manufactured under ISO 9001 International all be as manufactured by Belimo.

**Factory settings** Default parameters for 2 to 10 VDC applications of the LF..-MFT actuator are assigned during manufacturing. If required, custom versions of the actuator can be ordered. The parameters are variable and can be changed by three means: Factory pre-set or custom configuration, set by the customer using PC-Tool software or the handheld ZTH US.

### **Electrical installation**

# Marning! Live electrical components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

Meets cULus requirements without the need of an electrical ground connection.

Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches.

Mixed or combined operation of line voltage/safety extra low voltage is not allowed.

(A) Actuators with appliance cables are numbered.

 $\bigwedge$  Provide overload protection and disconnect as required.

Actuators may also be powered by DC 24 V.

5 Only connect common to negative (-) leg of control circuits.

A 500 Ω resistor (ZG-R01) converts the 4...20 mA control signal to 2...10 V.

Control signal may be pulsed from either the Hot (Source) or Common (Sink) 24 V line.

For triac sink the Common connection from the actuator must be connected to the Hot connection of the controller. Position feedback cannot be used with a triac sink controller; the actuator internal common reference is not compatible.

Actuators may be connected in parallel if not mechanically linked. Power consumption and input impedance must be observed.

🛕 IN4004 or IN4007 diode. (IN4007 supplied, Belimo part number 40155).

A One built-in auxiliary switch (1x SPDT), for end position indication, interlock control, fan startup, etc.
