

#### **Technical data**

| Functional data    | Valve Size                | 2" [50]  |
|--------------------|---------------------------|--|
|                    | Fluid                     | chilled or hot water, up to 60% glycol                                 |
|                    | Fluid Temp Range (water)  | 0250°F [-18120°C]  |
|                    | Body Pressure Rating      | 400 psi  |
|                    | Close-off pressure ∆ps    | 200 psi  |
|                    | Flow characteristic       | A-port equal percentage, B-port modified for constant common port flow |
|                    | Servicing                 | maintenance-free   |
|                    | Flow Pattern              | 3-way Mixing/Diverting   |
|                    | Leakage rate              | 0% for A – AB, <2.0% for B – AB  |
|                    | Controllable flow range   | 75°  |
|                    | Cv                        | 29   |
|                    | Body pressure rating note | 400 psi  |
|                    | Cv Flow Rating            | A-port: as stated in chart B-port: 70% of A – AB Cv                    |
| Materials          | Valve body                | Nickel-plated brass body   |
|                    | Stem seal                 | EPDM (lubricated)  |
|                    | Seat                      | PTFE   |
|                    | Pipe connection           | NPT female ends  |
|                    | O-ring                    | EPDM (lubricated)  |
|                    | Ball                      | stainless steel  |
| Suitable actuators | Non-Spring                | ARB(X)   |
| otoc               |                           |  |

Safety notes

• WARNING: This product can expose you to lead which is known to the State of California to cause cancer and reproductive harm. For more information go to www.p65warnings.ca.gov

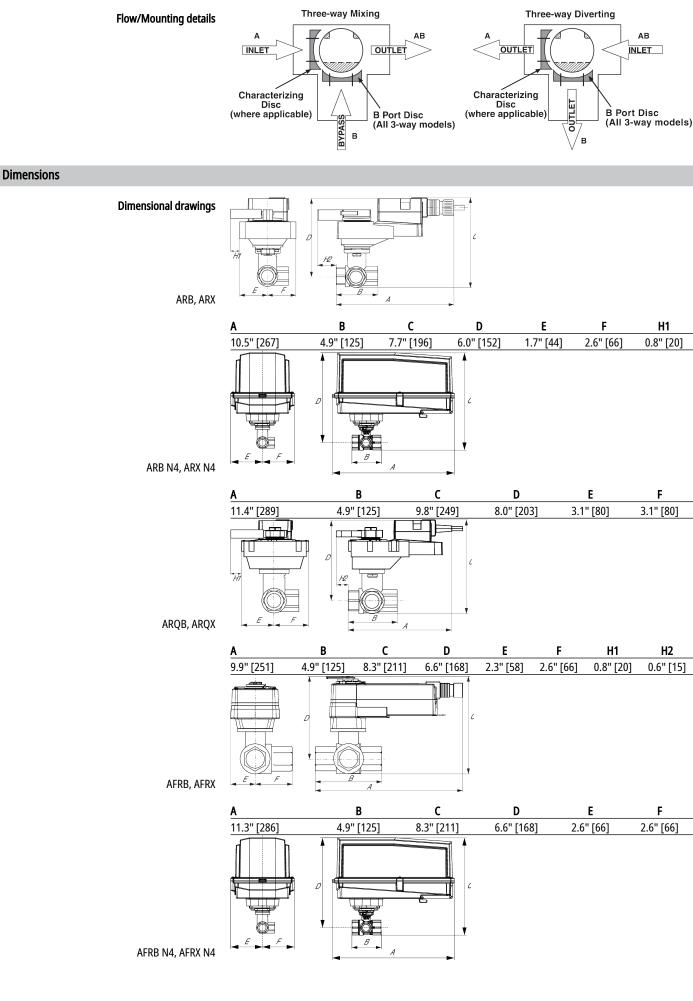

### **Product features**

Application

This valve is typically used in air handling units on heating or cooling coils, and fan coil unit heating or cooling coils. Some other common applications include Unit Ventilators, VAV box re-heat coils and bypass loops. This valve is suitable for use in a hydronic system with variable or constant flow.

## Safety notes

## Technical data sheet

# NEMA 4X, 316L stainless steel enclosure. Battery Back Up System for SY(7~10)-110 ZS-300 without brackets.

- Terminal-strip cover for NEMA 2 rating (-T models).
- MFT95 resistor kit for 4 to 20 mA control applications.
- Battery Back Up System for SY(10~12)-220P

Accessories

**Electrical installation** 

#### X INSTALLATION NOTES

f Provide overload protection and disconnect as required.

Actuators may also be powered by 24 VDC.

 $\,$  Actuators with plenum cable do not have numbers; use color codes instead.

 $\frac{1}{2}$  Actuators and controller must have separate transformers.

 $\binom{2}{23}$  Consult controller instruction data for more detailed information.

A Resistor value depends on the type of controller and the number of actuators. No resistor is used for one actuator. Honeywell® resistor kits may also be used.

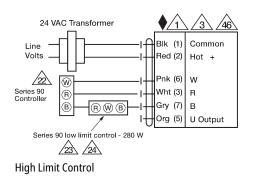

25 To reverse control rotation, use the reversing switch.

 $_{
m b}$  Actuators may be controlled in parallel. Current draw and input impedance must be observed.

Meets cULus requirements without the need of an electrical ground connection.

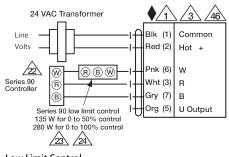

#### Varning! Live Electrical Components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

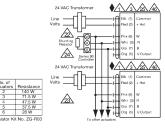

Typical and Override Control

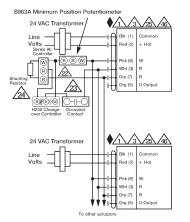

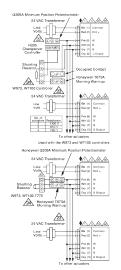

Low Limit Control

**Multiple Actuators** 

Multiple Actuators with Minimum Position Potentiometer

Multiple Actuators Used with W973, W7100 and T775
