Potable water valve, 2-way, internal thread

- For potable water applications
- NSF/ANSI 372 Lead Free
- NSF/ANSI 61 Water Quality

Technical data sheet

EXT-B2075-PWV-NPT

2-year warranty

Technical data

Valve Size	0.75" [20]	
Potable water certificate	NSF/ANSI 61 NSF/ANSI 372	
Fluid	Potable water	
Fluid temperature	-4212°F [-20100°C]	
Body Pressure Rating	600 psi CWP	
Close-off pressure Δps	200 psi	
Differential pressure Δpmax	200	
Angle of rotation	90°	
Pipe connection	NPT female	
Servicing	maintenance-free	
Flow Pattern	2-way	
Leakage rate	0%	
Cv	49	
Valve body	Lead free brass	
Cha	Land for a large	

Materials

Valve body	Lead free brass
Stem	Lead free brass
Seat	PTFE
O-ring	EPDM
Ball	Chrome plated lead free brass
Non-Spring	LRB(X)
Spring	I E

Suitable actuators

on-Spring		
oring		

Safety notes

The ball valve has to be exercised at least once a week, so that the quality of potable water as well as the functionality are not affected.

Product features

Mode of operation

The on/off ball valve is adjusted by a rotary actuator. The rotary actuator is connected by an on/off signal. Open the ball valve counterclockwise and close it clockwise.

Installation notes

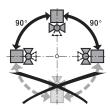

Notes

The ball valve is a regulating device. To fulfil this control task in the long term, the circuit must be kept free from particle debris (e.g. welding beads during installation work).

Recommended installation positions

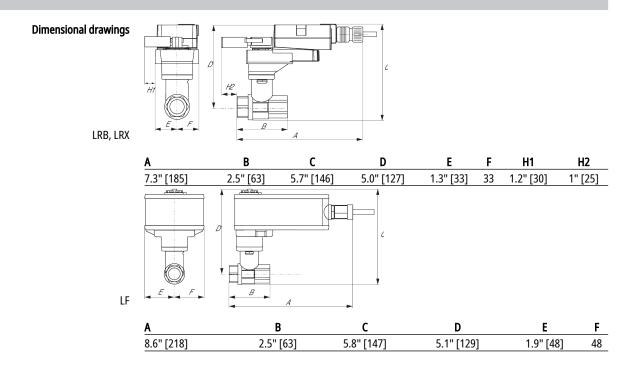

The ball valve can be installed upright to horizontal. The ball valve may not be installed in a hanging position, i.e. with the stem pointing downwards.

Servicing Ball valves and rotary actuators are maintenance-free.

Dimensions

On/Off, Floating Point, Spring Return, 24 V

On/Off, Floating Point, Spring Return, 24V, Torque min. 35 in-lb, for control of air dampers

	Degree of protection NEMA/UL	NEMA 2
	Enclosure	UL Enclosure Type 2
	Agency Listing	cULus acc. To UL 873 and CAN/CSA C22.2 No. 24-93; Listed to UL 2043 - suitable for use in air plenums per Section 300.22(c) of the NEC and Section 602.2 of the IMC
	Quality Standard	ISO 9001
	Ambient temperature	-22122°F [-3050°C]
	Storage temperature	-40176°F [-4080°C]
	Ambient humidity	Max. 95% RH, non-condensing
	Servicing	maintenance-free
Weight	Weight	3.4 lb [1.6 kg]
Materials	Housing material	galvanized steel

Product features

Application

For modulation or On/Off, fail-safe control of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer's specifications. The actuator is mounted directly to a damper shaft from 3/8" up to 1/2" in diameter by means of its universal clamp, 1/2" shaft centered at delivery. For shafts up to 3/4" use K6-1 accessory. A crank arm and several mounting brackets are available for applications where the actuator cannot be direct coupled to the damper shaft. Control is floating point from a triac or relay, or On/Off from an auxiliary contact from a fan motor contactor, controller or manual switch.

Operation

The LF series actuators provide true spring return operation for reliable fail-safe application and positive close-off on air tight dampers. The spring return system provides consistent torque to the damper with, and without, power applied to the actuator. The LF series provides 95° of rotation and is provided with a graduated position indicator showing 0...95°. The LF24-3-S US uses a brushless DC motor which is controlled by an Application Specific Integrated Circuit (ASIC) and a microprocessor. The microprocessor provides the intelligence to the ASIC to provide a constant rotation rate. The ASIC monitors and controls the brushless DC motor's rotation and provides a digital rotation sensing function to prevent damage to the actuator in a stall condition. The actuator may be stalled anywhere in its normal rotation without the need of mechanical end switches. Power consumption is reduced in holding mode. The LF24-3-S US version is provided with one built-in auxiliary switch. This SPDT switch is provided for safety interfacing or signaling, for example, for fan start-up. The switching function is adjustable between 0° and 95°. The auxiliary switch in the LF24-3-S US is double insulated so an electrical ground is not necessary.

Typical specification

Floating point, On/Off spring return damper actuators shall be direct coupled type which require no crank arm and linkage and be capable of direct mounting to a shaft up to a 3/4" diameter and centers on a 1/2" shaft (default). The actuators must be designed so that they may be used for either clockwise or counter clockwise fail-safe operation. Actuators shall have an external direction of rotation switch to reverse control logic. Actuators shall use a brushless DC motor and be protected from overload at all angles of rotation. If required, one SPDT auxiliary switch shall be provided having the capability of being adjustable. Actuators with auxiliary switch must be constructed to meet the requirements for Double Insulation so an electrical ground is not required to meet agency listings. Run time shall be constant and independent of torque. Actuators shall be cULus listed, have a 5 year warranty, and be manufactured under ISO 9001 International Quality Control Standards. Actuators shall be as manufactured by Belimo.

Electrical installation

/ Warning! Live electrical components!

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.

Meets cULus requirements without the need of an electrical ground connection.

Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches. Mixed or combined operation of line voltage/safety extra low voltage is not allowed.

(A) Actuators with appliance cables are numbered.

A Provide overload protection and disconnect as required.

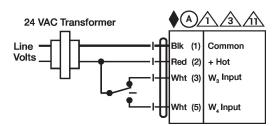

Actuators may also be powered by DC 24 V.

Actuators Hot wire must be connected to the control board common. Only connect common to neg. (-) leg of control circuits. Terminal models (-T) have no-feedback.

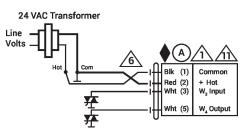

Actuators may be connected in parallel if not mechanically linked. Power consumption and input impedance must be observed.

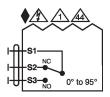

One built-in auxiliary switch (1x SPDT), for end position indication, interlock control, fan startup, etc.
