## FSNF120 US

On/Off, Spring Return, 350°F [177°C] for half an hour, AC 120 V, 15 s Cycle Time

- Torque 8 Nm / from 32...350°F [0...177°C]
- Nominal voltage AC 120 V
- Control On/Off

#### **Technical data**

## Safety notes

Product features	<ul> <li>* Neither UL nor Belimo require local over-current protection. The F peak current when driving against any type of stop. If used, this req fuse or breaker to be increased to avoid nuisance opening or trippir should be used for AC 24 V. A 0.5 A slow blow should be used for AC 230 V and a 0.3 A slow blow for AC 208 V. Transfor 24 V 100 VA transformer would handle 2 actuators, a 4 A breaker or 5 A slow blow would be required.</li> <li>Belimo Fire &amp; Smoke actuators have passed the AMCA 520 and UL 5 test. No special cycling is required during prolonged periods when a held there. Periodic testing of dampers and actuators per local code 105 are required.</li> <li>The actuator contains no components which the user can replace or connector, these actuators are identical to the conduit connector vertex.</li> </ul>	uires the value of a local ng. A 2.5 A slow blow 120 V. A 0.25 A slow blow ormers: Note that while a plug fuse is insufficient. A 55S Long Term Holding actuator is driven open and es and NFPA 80 and NFPA repair. A 1/2" threaded r. Other than the
Application	The FS series of spring-return actuators are designed for the operation of UL555 and UL555S listed fire/smoke dampers in ventilation and air-conditioning systems.	
Operation	The actuator is mounted in its fail safe position with the damper blade(s) typically closed. Upon applying power, the actuator drives the damper to the open position. The internal spring is tensioned at the same time. If the power supply is interrupted, the spring moves the damper back to its fail-safe position.	
Typical specification	All smoke and combination fire and smoke dampers shall be provided with Belimo FSTF, FSLF, FSNF, or FSAF series actuators. All substitutions must be approved before submission of bid. Damper and actuator shall have UL555S Listing for 250°F and/or 350°F. Actuator shall have been tested to UL2043 per requirements of IMC 602.2 and NEC 300.22 (c). Where position indication is required -S models with auxiliary switches shall be provided.
