

Communicative damper actuator for adjusting dampers in technical building installations

- Air damper size up to approx. 2 m²
- Torque motor 10 Nm
- Nominal voltage AC/DC 24 V
- Control modulating, communicative, Hybrid
- Conversion of sensor signals
- Communication via BACnet MS/TP, Modbus RTU, Belimo-MP-Bus or conventional control

Technical data					
Electrical Data	Nominal voltage	AC/DC 24 V			
	Nominal voltage frequency	50/60 Hz			
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V			
	Power consumption in operation	3.5 W			
	Power consumption in rest position	1.4 W			
	Power consumption for wire sizing	6 VA			
	Connection supply / control	cable 1 m, 6 x 0.75 mm ²			
Functional Data	Torque motor	10 Nm			
	Torque variable	25%, 50%, 75% reduced			
	Communicative control	BACnet MS/TP			
		Modbus RTU (ex works)			
		MP-Bus			
	Operating range Y	DC 210 V			
	Operating range Y variable	DC 0.510 V			
	Position feedback U	DC 210 V			
	Position feedback U note	Max. 1 mA			
	Position feedback U variable	Start point DC 0.58 V			
	Danisia and an annual and an an an an an	End point DC 210 V			
	Position accuracy	±5%			
	Direction of motion motor	selectable with switch 0/1			
	Direction of motion note	Y = 0%: At switch position 0 for ccw rotation or			
	Direction of motion variable	1 for cw rotation, respectively electronically reversible			
	Manual override	with push-button, can be locked			
	Angle of rotation	Max. 95°			
	Angle of rotation note	can be limited on both sides with adjustable			
	Angle of rotation note	mechanical end stops			
	Running Time (Motor)	150 s / 90°			
	Running time motor variable	43173 s			
	Adaptation setting range	manual			
	Adaptation setting range variable	Adaptation when switched on			
		Adaptation after pushing the gear			
		disengagement button			
	Override control, controllable via bus	MAX (maximum position) = 100%			
	communication	MIN (minimum position) = 0%			
	Overmide control veriable	ZS (intermediate position) = 50%			
	Override control variable	MAX = (MIN + 32%)100% MIN = 0%(MAX - 32%)			
		ZS = MINMAX			
	Noise level, motor	35 dB(A)			
	Mechanical interface	Universal shaft clamp 826.7 mm			
	Position indication	Mechanically, pluggable			
Safety	Protection class IEC/EN	III safety extra-low voltage (selv)			
	Protection class UL	UL Class 2 Supply			
	Degree of protection IEC/EN	IP54			
	Degree of protection NEMA/UL	NEMA 2			
	Enclosure	UL Enclosure Type 2			
	EMC	CE according to 2014/30/EU			
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14			

Damper Actuator, modulating, communicative, Hybrid, AC/DC 24 V, 10 Nm

Technical data

Certification UL	cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1:02
Mode of operation	Type 1
Rated impulse voltage supply / control	0.8 kV
Control pollution degree	3
Ambient temperature	-22122°F [-3050°C]
Storage temperature	-40176°F [-4080°C]
Ambient humidity	max. 95% r.H., non-condensing
Maintenance	maintenance-free
Weight	2.0 lb [0.92 kg]
	Mode of operation Rated impulse voltage supply / control Control pollution degree Ambient temperature Storage temperature Ambient humidity Maintenance

Safety Notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the actuator and that is ensured that the ambient conditions remain at any time within the thresholds according to the data sheet.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- Cables must not be removed from the device.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation site and the ventilation conditions must be observed.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Mode of operation

The actuator is fitted with an integrated interface for BACnet MS/TP, Modbus RTU and MP-Bus. It receives the digital positioning signal from the control system and returns the current status.

Converter for sensors

Connection option for a sensor (passive, active or with switching contact). In this way, the analogue sensor signal can be easily digitised and transferred to the bus systems : BACnet, Modbus or MP-Bus.

Configurable actuators

The factory settings cover the most common applications. Single parameters can be modified with the Belimo Service Tools MFT-P or ZTH EU.

The communication parameters of the bus systems (address, baud rate etc.) are set with the ZTH EU. Pressing the "Address" button on the actuator while connecting the supply voltage, resets the communication parameters to the factory setting.

Quick addressing: The BACnet and Modbus address can alternatively be set using the buttons on the actuator and selecting 1...16. The value selected is added to the «Basic address» parameter and results in the effective BACnet and Modbus address.

Combination analogue - communicative (hybrid mode) With conventional control by means of an analogue positioning signal, BACnet or Modbus can be used for the communicative position feedback

Simple direct mounting

Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti-rotation device to prevent the actuator from rotating.

Manual override

Manual override with push-button possible (the gear is disengaged for as long as the button is pressed or remains locked).

Adjustable angle of rotation

Adjustable angle of rotation with mechanical end stops.

High functional reliability

The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.

Product features

Home position

The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out a synchronisation. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the positioning signal.

Adaption and synchronisation

An adaption can be triggered manually by pressing the "Adaption" button or with the PC-Tool. Both mechanical end stops are detected during the adaption (entire setting range).

Automatic synchronisation after pressing the gearbox disengagement button is configured. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the positioning signal.

A range of settings can be adapted using the PC-Tool (see MFT-P documentation)

Electrical installation

Notes

- · Connection via safety isolating transformer.
- The wiring of the line for BACnet MS/TP / Modbus RTU is to be carried out in accordance with applicable RS485 regulations.
- Modbus / BACnet: Supply and communication are not galvanically isolated. Connect earth signal of the devices with one another.

Cable colours:

BACnet / Modbus signal assignment:

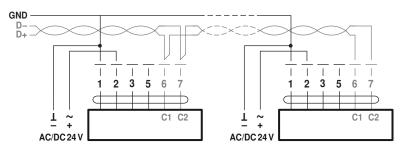

1= black 2 = red3 = white 5 = orange

6 = pink7 = grey

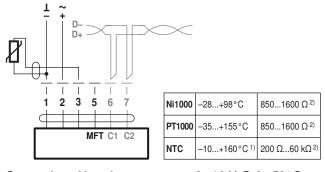

C1 = D - = AC2 = D + = B

Wiring diagrams

BACnet MS/TP / Modbus RTU

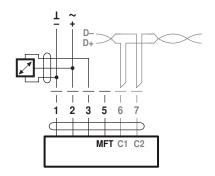

Connection with passive sensor, e.g. Pt1000, Ni1000, NTC

- 1) depending on type 2) Resolution 1 Ohm

Connection with active sensor, e.g. 0...10 V @ 0...50°C

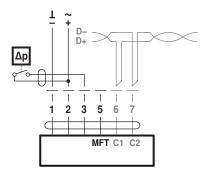

Possible voltage range:

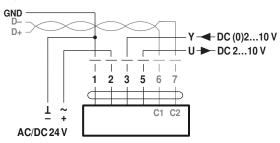

Electrical installation

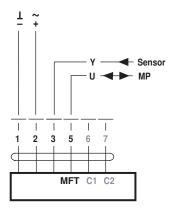

Connection with switching contact, e.g. Δp monitor

Modbus RTU / BACnet MS/TP with analogue setpoint (hybrid mode)

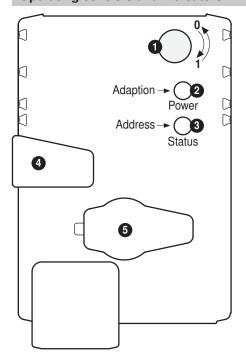

Operation on the MP-Bus

Requirements for switching contact: The switching contact must be able to accurately switch a current of 16 mA @ 24 V.

Operating controls and indicators

Service

Quick adressing

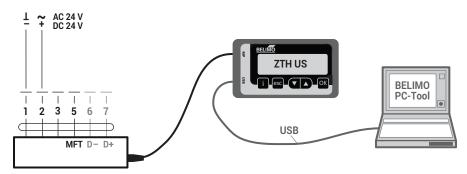

- 1. Press the "Address" button until the green "Power" LED is no longer illuminated. LED flashes in accordance with the previously set address.
- 2. Set the address by pressing the "Address" button the corresponding number of times (1...16).
- 3. The green LED flashes in accordance with the address that has been entered (...16). If the address is not correct, then this can be reset in accordance with Step 2.
- 4. Confirm the address setting by pressing the green "Adaption" button.

If no confirmation occurs for 60 seconds, then the address procedure is ended. Any address change that has already been started will be discarded.

The resulting BACnet MS/TP and Modbus RTU address is made up of the set basic address plus the short address (e.g. 100+7=107).

Service Tools connection

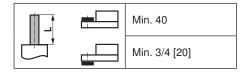

The actuator can be configured by ZTH EU via the service socket. For an extended configuration the PC tool can be connected.
