DESCRIPTION

CW Protocol Series is a non-dispersive infrared (NDIR) sensor designed for measuring CO₂ concentration in ventilation systems and indoor living spaces. Its measurement range of 0-5000 ppm makes it the premier solution for meeting ASHRAE and other ventilation efficiency standards.

CW Protocol devices feature embedded BACnet and Modbus communication protocols, as well as optional temperature and humidity sensors. An adjustable setpoint relay is provided for direct control and alarm applications, and the optional setpoint slider and pushbutton override offer additional local input.

APPLICATIONS

- Controlling ventilation in response to occupancy
- Office buildings, schools, or other systems utilizing BACnet or Modbus protocol

EMC Conformance: Low voltage directive 2006/95/EC & EMC directive 2004/108/EC.
EMC Special Note: Connect this product to a DC distribution network or an AC/DC power adaptor with proper surge protection (EN 61000-6-1:2007 specification requirements)

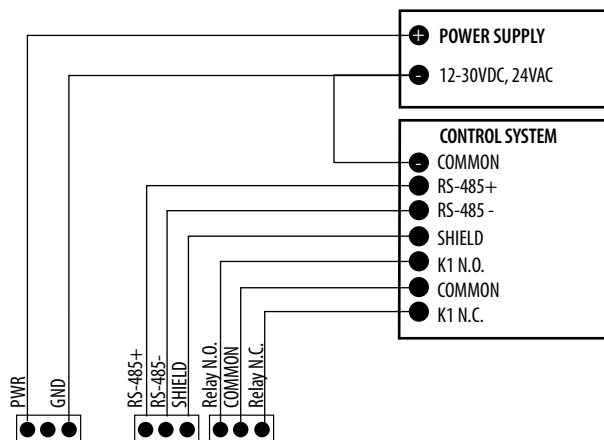

* Measured at NTP

** Specified accuracy with 24VDC supplied power with rising humidity.

*** Reset rate is the time required to recover to 50% RH after exposure to 90% RH for 24 hours.

Note: Rough handling and transportation may cause a temporary reduction of CO₂ sensor accuracy. With time, the ABC function will tune the readings back to the correct accuracy range. The default tuning speed is limited to 30 ppm per week.
